Naveena,

Marty is out today and will return tomorrow.

She asked me to send this to you on her behalf:

As indicated previously, a rule to create a program for the management of coal ash in Texas is being developed. Once the TCEQ's coal ash rule has been adopted, the agency will take appropriate actions to monitor compliance at the 17 coal plants located in Texas, including pursuing enforcement for documented violations of the rule requirements. Until that time, the TCEQ continues to investigate complaints and conduct routine investigations at the referenced sites to ensure compliance with applicable existing rules and regulations.
